EXPERIENCE

Handshake

Jul 2026 – Present

AI Evaluation Specialist

Remote

- Evaluate frontier-model responses on software engineering and data tasks, grading correctness, reasoning quality and instruction-following against detailed rubrics.
- Author adversarial prompts and reference solutions that surface failure modes in code generation, debugging and multi-step tool use.
- Write structured critiques that feed directly into model training signal, with an emphasis on reproducible, evidence-backed judgements.

Amazon

Jan 2026 – Jun 2026

Data Engineer Intern

Bengaluru, Karnataka, India

- Designed a Spark/EMR **Data Quality Framework** processing **1 billion+** daily records across 5 regions. Deployed a Z-score anomaly detection model, accelerating data reliability by **25%**.
- Migrated **10+** big data pipelines, resolving Scala build conflicts. Built a **Python CLI** to bulk-migrate **100+** profiles, reducing deployment time by **40%**.
- Re-architected a **Low Inventory Audit** pipeline serving 11 marketplaces and 20+ data sources, achieving **100%** output parity with the legacy infrastructure.
- Developed a **14-day** advanced notification system for inventory levels, successfully preventing over **25%** of critical monthly stockout events globally.

PROJECTS

ELD Trip Planner

July 2026

React, Django, Django REST Framework, Python, PostgreSQL

- Built a full-stack planner that turns four trip inputs into an hours-of-service compliant route plus **auto-generated FMCSA log sheets**, drawing a 24-hour duty grid per day in SVG.
- Engineered a dependency-free rules engine encoding **six federal driving and rest limits**, backed by 20 unit tests and a self-validation pass that flags violations.
- Replaced **25 rate-limited geocoding calls per trip** with an offline **30,000-city index**; integrated Nominatim, OSRM and Leaflet for a **zero-API-key** map stack on Vercel and Render.

CodeHolic

Dec 2024

MongoDB, ExpressJS, ReactJS, Redux, Cloudinary, Razorpay

- Created a role-based **EdTech** platform for 500+ students. Enabled instructor content creation and comprehensive admin controls for categories and permissions.
- Integrated **Cloudinary** for secure media management. Implemented **Redux** for global state control across **5+** real-time dashboards to ensure a seamless UX.
- Implemented secure **JWT** authentication with role-based access control. Integrated **Razorpay** to seamlessly process real-time course payments and track transactions.

TECHNICAL SKILLS

- Programming Languages: **C, C++, Python, Java, JavaScript, SQL, Scala**
- Framework & Libraries: **ReactJS, NextJS, Django, Redux, HTML, CSS, Tailwind CSS, Shadcn**
- Tools & Platforms: **NodeJS, ExpressJS, MongoDB, PostgreSQL, Unicorn, AWS, Git, GitHub**

EDUCATION

Jadavpur University

2022 – 2026

B.E. – Information Technology – CGPA 7.89

Kolkata, India

COURSEWORK

- Data Structures & Algorithms
- Database Management System
- Object Oriented Programming
- Operating System
- Computer Networks

ACHIEVEMENTS

- Qualified for Round 2 of the **Adobe India Hackathon 2025**, building an AI-powered document intelligence solution under strict offline and performance constraints.
- Solved **1000+** coding problems on various platforms like LeetCode, GFG, CodeChef and Codeforces.
- Scored **99.1 percentile** and achieved **AIR 8120** in **JEE Mains** Examination.
- Secured **566th** rank out of 100,000+ candidates (top 0.6%) in **WBJEE**.
